Geology Today

Index 2003

Achnarras Quarry, Scotland 66
acid rain 211
acidophiles 100
Acta Palaeontological Polonica, focus on 134–5
  feeding the seagulls 134–5
  minor miracle from China 135
Adams, Jonathan, architect for Millennium Centre, Cardiff 79–80, *80*
Addingham Edge Grit 179
Africa, new human subspecies 119
aggregate, demand likely to decline 129
Aggregates Levy, UK 68
  creation of a Sustainability Fund 68–9
    English Nature's grant scheme 68–9
AITKENHEAD, N., How did the calf get there? Ilkley Moor, and the Cow and Calf Rocks 179–80
Alderley Edge, Cheshire, Barclays Bank in the sandstone, history behind 5
Allonnia phrixothrix (reconstruction) 135
Alston Moor 11–13
  availability of publications 12–13
  mining and mineral heritage 12
  museum at old mine site at Killhope 12
    The Secret World of Spar Boxes (pamphlet) 12
  River Nent 12
  Rocks and Landscape of Alston Moor, Cumbria RIGS 11–12
amazonite 210–11
amber
  examples of helminths leaving their hosts 141
  preservation of insects and entomogenous nematodes 141
ammonite, in Antarctica (front cover)3
Anaspid fishes (Fossils explained) 111–13
  gross body morphology 111–12
    terminology for a description *112*
  phylogenetic position 113
    exact position open to debate 113
    taxonomic and adaptive radiation, early Palaeozoic 113
  scale histology 112, *114*
    compact lamellar acellular bone 112
  scale morphology 112, *112*, *113*
  stratigraphical distribution 113
    late Ludlow–early Lochkovian septentrionid fauna 113
    Llandovery–early Wenlock *Birkenia* fauna 113
    Wenlock–Middle Ludlow rhyncolepid fauna 113
andalusite 33
  pseudomorphism to kyanite 34
Anstrude Jaune Claire 159, 160
Antarctica
  Lake Vostok
    micro-organisms within the ice layers 100
    terrestrial analogue for Europa 100
  long-lived microbes retrieved from a frozen lake 44
  psychrophiles inhabit the Dry Valleys 100
    cryptoendoliths 100
    models for biota within Martian rocks 100
apatite, mined at Khibiny, Kola Peninsula 207
Apex Chert 99
aquifers
  geology affects chemistry of brewing water 25
  surprising civil engineers 205
Aquitaine Limestone 163
Aral Sea, changes in extent 191
Arctic ice cap, universal thinning of sea ice 191–2
ARKWRIGHT, J.C. *et al.*, The Mam Tor landslip: still moving after all these years 59–64
Armathwaite dyke 147, *148*
Arno's Vale cemetery saved, Bristol 52–3
art is science, science can be art 149–50
  the demise of field sketching 148
art?, mismatching of polished black gabbro cladding slabs 14–15, *15*
asbestosis 133
Asfordby superpit, Leicestershire
  effects of failure of block above mined seams 177
  microseismic monitoring system shoed major set of fractures 177
ashlar 153, 156
Astrobiology: the search for life beyond the Earth 99–103
  emergence of life on Earth 99–100
  life beyond the Solar System 102–3
    age 102
    size 103
    stability 103
  life on other planets 101–2
    Europa 102
    Mars 101–2
  where on Earth is life now 100–1
    Antarctica 100
    the ocean floor 101
astrophyllite 208, *208*
augen-gneiss 49
Australia, winemaking 24
avalanches
  deep-earth 58
  impending or not, Cupi glacier, Peru 86

bacteria, and archaea, psychrophilic 100
baddeleyite 209
badgers
  in engineering geology 97–8
    potential to destabilize engineering slopes 97
  protection afforded to, has led to problems in a Corallian SSSI in Berkshire 200
BAKER, S. *see* DONOVAN, S.K., and BAKER, S.
Bargate Beds 16
BARKLIE, R. *see* STILLMAN, C. BARKLIE, R., and JOHNSON, C.
barley, and brewing of beer 26
Bath Stone 52, 87, 152, 156
  compressive strength 153
  for war memorials 13
beaches, stony, Hornsea and Withernsea 104
beer, role of geology 25–7
  breweries and beer styles 25–7
    19th century change in beer making 26
    Burton-on-Trent groundwater 25–6
  other geological influences 27
    development of deep free-draining soils 27
  uses of water in brewing 25
Bellerophon tangentialis 224
Bempton, chalk cliffs, Britain's only gannet colony 105
Berthelinia elegans 224
biodiversity, and geodiversity 104
bioerosion 171
biological envelope of life 100
birds, attacking lingulid brachiopods 134–5
Birkenia 112
Birkenia elegans 112
birkeniids 111
bivalve molluscs, parasitism by digenean flatworms 141, *142*
Black Sea, origin of in relationship to Noachian deluge 158
Blencathra 147
BLOM, H. *see* MILLER, C.G. *et al*
BOLIDE, Christine Kulyk 8
bolides, and rubber band balls 85
Book reviews 36–40, 76–8, 114–16, 186–8, 227–8
boudinage structures (let.) 54
boulders/pebbles, dangers of removal from beaches 106
Bowerbank, Sir James Scott: a forgotten geologist (Historical notes) 219–22
  A History of the Fossil Fruits and Trees of the London Clay, part 1 222
  collecting on the Isle of Sheppey (let.) 220–2
  fossil plants a speciality 219
  home a gathering point for geologists and others 219
  and the Palaeontographical Society 222
  played important role in growth of the Geological Society 222
  proposed a publishing Tertiary Society 222
Boxgrove gravel pit, bought by English Heritage 160
  much work is still to be done 160
brachiopods, lingulid, effects of predation on (Baja California) 134–5
  birds seen as main culprits 135
  two types of Gulf fauna capable of attack 134–5
Branch Line 79–80
Brazil, kyanite in Minas Gerais 35
Briefing 2–8, 42–4, 82–9, 118–25, 158–68, 190–6
Bristol
  Arno's Vale cemetery saved 52–3
  Longwell Green
    known to be underlain by abandoned mine workings 175
    usefulness of microgravity map 175
Bristol–Bath, Sustrans cycle path, fossil and mineral table, August Bank Holiday 160–2
British Association, geology at 166
British Geological Society, *Tourist's Rock, Fossil and Mineral Map of Great Britain*, shows lasting influence of William Smith 91
British Library, 'The Planets', Fennoscandian metamorphic rocks 49
British Museum, South Portico
  passing judgement on geological terms used 159–60
    Anstrude Jaune Claire mechanically stronger than Portland Whitbed 159
brockram 146
Buckland, Professor William, coprolite table 198, *198*
Budleigh Salterton, loss of pebbles and rocks to gardeners 5
Building stones explained 151–6
Bunbury, Charles, on Dr James Scott Bowerbank 219
Bureau de Recherches Géologiques et Minières (BRGM), popular publications and gifts 92–3
  jigsaw puzzle of geological map of France 92–3
  map and guide, *Massif Central Curiosités Géologiques* 93
  tie showing traverse through heart of France 92
BUREK, C.V., Catherine Raisin, a role-model professional geologist 107–11
Bushveld Complex, gabbro from 14–15, *15*
busts, grade-two listed, lost to cleaning fluids 4

Cadeby Formation, Anstone Stone 20
Caldbeck Hills 147
Campanile giganteum 226
Canada, Klondike (back cover)2
canals and railways, cheap movement of bulk materials 106–7
Cardiff, city of geology 79–80
  Millennium Centre, Jonathan Adams and the quest for slate 79–80, *80*
  NCM building, street level geology 79, *80*
  Pierhead Building 79, *79*
Carrara marble 52
cathedrals, European, transfer lateral loads to compressive loads 153
cave paintings, Cresswell Crags, Derbyshire 119
caves, prehistoric, mainly in limestone massifs 152
Cenoceras perinflatum 184
cephalopods, principal groups 181
Cézanne, Paul
  geology in paintings of Mont St Victoire 148, 149
  learnt to read landscapes with Antoine-Fortune Marion (scientist) 148
Chalmers, Neil (Natural History Museum), and the abolition of entry fees 6–7
Chancelloria 135
chatoyancy 94
Chicxulub Crater, Mexico, 'bones of contention' over who should receive/has received study samples 190
China
  Doushantuo Formation, fauna older than Ediacaran 17–18, *18*
  exceptional preservation of soft tissue in Chengjiang biota 135
  geological museum in Nanjing
    progress halted 7
    will now be completed 89
  landscape painting are 'portrait' 90
  micromammals 75
  provision of granite setts and kerbs 162
chrome-kyanite 33

Figures in *Italic*, Tables in **Bold**; let. = letter.

Cimomia imperialis 184
cinnabar, more on (let.) 54–5
Clandon Traverse *see* Newlands Corner—Albury geology trail
Cleveland Basin, North Yorkshire, dinosaur tracks and trackways 132, *132*, *133*
Closchouse—Lunedale Fault 146
CMB *see* core-mantle boundary (CMB)
coal
  destruction of (and much else), Colorado 82–3
  orbital cycles recorded in 97
coal mine monitoring 176–7
  borehole microseismic monitoring system, Asfordby superpit 177
  caving behaviour near longwall extraction 176
  seismic detectors (geophones) used 176
coalmines, abandoned, continuing seismicity from 177–8
  earthquakes near Whitmore, Newcastle-under-Lyme 177
  Silverdale Colliery, abandoned 2000, leads to re-equilibriation of stresses 177–8
coastal flooding, east coast, UK, major storm 1953 3
cobbles, King's Cross 14
comets
  detected by SOHO (NSAS Solar and Heliospheric Observatory) 10
  landing on Wirtanen postponed 43
Comley Limestone 135
commensalism, obligate, platyceratid–crinoid relationship 139
Commonwealth Memorial Gates 88–9, *88*
Community 6–8
cone structure, origin of 95, *95*, *96*
contaminated land 173
coprolites
  again 198
  recognition of nematode and digenean eggs in 141
core-mantle boundary (CMB)
  postulating avalanches, slumps or turbidity flows at 58
    avalanching caused by oblique extraterrestrial impacts 58
Corennie Granite 123
Correspondence 54–6
Countryside and Rights of Way Act (2000), enhances protection of geological SSSIs 66
Coward, Professor Mike, obituary 163
Crassicauda 138
Craven Fault-zone 144
creep, continuous, Mam Tor landslip 59
crinoid stems, bored 139
Cross Fell inlier 143
cyclothems
  Silesian (Namurian) 143
  Yoredale (Dinantian) 144
Czech Republic, softwater
  Budweiser (original) brewed at Budwar 26
  lager brewing at Pilsen 26

DAVIES, J.H., on the monument to a Welsh freedom fighter 163–4
De Lank Granite 86–7, 163
Dead Sea Fault, recent slippage 21
DEFRA, pocket-sized run down of UK environmental statistics 200
Dent Fault 145–6
Dent marble 145
Dent (village)
  highest main line station in England 145
  monument to Adam Sedgwick 145
desalination plants, south coast of England 191
Diabaig Formation, appear to show sedimentary features attributable to microbial binding 56–7
diapirs, on Venus 169–70
differential erosion, of hillsides and meso-climates for vines 22
digeneans, gymnophallid, evidence of palaeoparasitism 141
DILLEN, R., Namibian meteorites — continued (let.) 54
Dimlington Stadial 179
dinosaur tracks/trackways, North Yorkshire 132
dinosaurs
  cannibalism in 85
  diet 191
  early use of term 'dinosaur' 21
  non-PC for USA educational publishers 118
  'Project Helpers' *Dinosaurs* at W.H. Smith 7
  role of quarries in earliest thinking 66
  'the end of', heated differences of opinion 190
  US campaign to repatriate an allosaurus from Japan 7
Dinosorex pachygnathus 71
dinoturbation 132
diopside 210
disthène *see* kyanite (Minerals explained)
dolerite, Whin Sill 105
DONOVAN, S.K.
  and BAKER, S., Post-Palaeozoic nautiloids (Fossils explained) 181–5
  and HENSLEY, C., Gastropods 1 (Fossils explained) 223–7
  see also LITTLEWOOD, D.T. and DONOVAN, S.K.
Doushantuo Formation
  fauna older than Ediacaran 17–18, *18*
  use of Lu-Hf dating method 17–18
DOYLE, P., Editorial changes 82
drainage of soils, important for vine growth 23
drumlin fields/mounds 143, 144, 146, 179
Dry Stone Walling Association of Great Britain 15–16
Dublin, Ireland
  heavily-roasted malts reduce mashing water pH to acceptable levels 26–7
  Viking iron-smelting, Temple Bar West 216–18
dykes, carbonatite 209

Earth
  bimodal hypsometry 169
  bombardment by comets and asteroids 99, 101
  earliest atmosphere 100
  emergence of life on 99
  equatorial bulge, growing again since 1998 10
  late heavy bombardment of, evidence for a chemical signature 17, *18*
  oldest traces of biological activity 99
  proposal to send probe to centre of the core 118–19
Earth Science
  turning science teachers on to 30–2
  websites of interest 202
earthquake swarms, shallow, Manchester 4
earthquakes
  Bingol, S. Turkey and Algeria 118
  San Francisco (1906), photography 89–90
echinoderms
  fossil, preservation of pits associated with growth deformities 138
  responses to parasitism 139
Eden Valley, half-graben 146
Educative acronyms 197
Elland Flags 20
engineering geology, badgers in 97–8
  St Asaph bypass, Ground Penetrating Radar used to examine badger diggings within 98, *98*
English Channel
  and North Sea, English Heritage wishes to map in 3-D 190
  Quaternary history 95–6
    drainage system created during periods of low sea level 96
English Nature
  acquisition of Ribblehead Quarry 69
  congratulated for efforts to increase awareness of geological value of quarries 127–8
Environment Agency
  acceptance of managed realignment 3
  prime target is reduction of water loss from leaking pipes 191
Environmental geophysics: a site characterization tool for urban regeneration in the post-mining era 173–8
  techniques and case studies
    development of new and novel techniques 178
    microgravity surveying 174–5
    microseismic monitoring 175–8
    scope for further development of present surveying techniques 178
Eomyops catalaunicus 71
Eomyops oppligeri 71
Ercall Quarries, Shropshire 66
erosion, Norfolk and Lyme Regis coasts, sea defence problem 84
Erratum 80
ES2K 197
ESEF (Earth Science Education Forum) 197
ESEU (Earth Science Education Unit) 197
Essex, UK, problem of sinking land and rising sea level 119
ESTA (Earth Science Teachers' Association) 197
Euciphoceras regalis 182, *184*
Eucymatoceras plicatus 182
eudialyte 208
Europa
  evidence of sub-surface salty ocean beneath water-ice shell 102
  potential to harbour life 102
Europe, localities for kyanite 35
European Community of Stone (ECOS), Frome 50–2
  little visited 50–1
  problem of EU expansion 51–2
  showcase for the stone trade 51
European Science Foundation, EEDEN (Environments and Ecosystem Dynamics of the Eurasian Neogene) program 75
Extraterrestrial watch 8–11
extremophiles 100
  discovery on Earth drives search on Mars 102

Faringdon Sponge Gravels 89
fault lines 6
faults, strike-slip, Mam Tor landslip 62
fauna, from Doushantuo Formation 17
fayalite 218
Fenlands 104
Fennoscandian Shield 206–7
Filholia elliptica 224
Five Yard Limestone, jointing controls cascading River Nent 12, *12*
Folkestone Sands 16
FORD, R., Coprolites again 198
FORESIGHT programme: natural resources and environment: non-invasive assessment for waste and contaminated land 173–4
Forest of Dean, Gloucestershire, industrial complex and Spa complex 190
fossil collectors, problems of access to working quarries 128
Fossil Nessie 158
Fossil parasites: a case of identity 136–42
  commensalism and mutualism/symbiosis 136, 137
  direct evidence of parasites and parasitism in the fossil record 139–40
  fossil helminths – possibilities and frustrations 140–2
    discrimination between pathological damage from parasites and other damage 141
  fossil hosts 137, 139
  fossils as arbiters of time in the evolution of parasitism 137
  nature of parasitism 137
    'host as habit' 137
  parasitism suggests an obligate relationship 136
  preservation potential 136
  reliance on parasite preservation with the host 137
fossils
  and minerals, table on Bristol–Bath cycle path, 160–2
  possible, Apex Chert, Western Australia 99–100, *99*
Fossils explained 70–6, 181–5, 223–7
France
  Anstrude Jaune Claire 159, 160
  Lascaux cave paintings suffering from fungal growth and black mould 85–6
  supposed relationship between wine and local factors (terroir) 22
Frank, Canada
  centenary of disastrous slide on Turtle Mountain 126–7
    trigger for slide 126–7
freestone 152
  used in Swaminarayan Hindu Mission, Neasden 152, *152*
From the Archive 172
Fuller's Earth Clay 87, *88*
Fusarium solani 86

Gastropods 1 (Fossils explained) 223–7
  diversity of 226–7
    adaptations to particular habitats 226
    largest 226
    planispirally coiled, broadly similar to some cephalopod groups 226
    pteropods have become planktic 227
    spinose 226–7, *226*
  geometry and morphology of the shell 225–6
    bellerophonts, problems of interpretation 225–6
    limiting parameters differ in marine and freshwater environments 226
    planispiral shell 225
  morphology 223, 225
    the aperture 223
    apical whorl 223
    aragonite shell 223, 225
    external sculpture 223
    foot 223
    occurrence of torsion 223
    predation by 225
    shell coiling direction 225
  respiration 223
geo-disasters, Frank slide centenary 126–7
Geodigest 17–21, 56–9, 132–5
  New research 94–8, 132–4, 169–72, 203–6
Geodiversity: our foundation 104–7
  eastern counties 104–5
  geodiversity 107
  limestone 106
  roofing 106–7
  water 105
'geodiversity in action, Devon quarries 202
Geodiversity and the Minerals Industry, Conserving our Geological Heritage, English Nature *et al* 129
geohazards 127, 173
  earthquakes, Bingol, S. Turkey and Algeria 118
  see also geo-disasters
geological conservation, origin of 66
geological guides
  Cleeve Common Trail 130
  Explore Severn Valley Railways 130
  Soudley Valley Trail Guide (fold leaflet) 130–1
Geological Society
  pamphlets on 'how geoscientists serve and protect the public' 127
  winners of medals, funds and awards 8
geologists
  bad behaviour in Craven and Peak District 201
  value of quarries and pits to 67
Geologists' Association Code for Geological Fieldwork 201, *201*
Geologists' Association Guides 66
geology
  bedrock, controls nature of soils hence affects vine growth 23
  geological history in a bollard 193–4
    Shap Granite with 'heathens' 194
  influences performance of vines and indirectly character of wines 22
  and pedal power 160–2
  rebranding 118
  sale of rare James Hutton books 118
Geology and quarries: some new opportunities 65–70
  the Aggregates Levy Sustainability Fund 68–9
  are geologists making the most of quarries and pits 65–6
    educational use 66
    well-known UK sites 65
  conservation of quarries 66
    Sites of Special Scientific Interest (SSSIs) 66
  corporate social responsibility, a new partnership opportunity 69
  different perspectives 67–8
    the general public 67
    geologists 67
    the government 68
    mineral extraction industry 67
  promoting value of quarries to the general public 66–7
  promotion of value of geology in quarries and pits 65
  see also quarry access
Geology in the regions, E. Robinson 11–17
Geology Today
  editorial changes 82
  and the Natural History Museum: a statement 53
Germany
  North German Plain, erratics the source of legends and folklore 48
  soil conditions in Tertiary molasses of Hallertau, ideal for hop-growing 27
Giant's Causeway 124–5
girvasite 210
glacial erratics, science and art 47–9
  chosen by sculptors for outdoor sculptures 47
  the Netherlands 47

teleosts, living, parasitized by helminths 137
television gardening, problems of 106
Tertiary History of the Grand Canyon, C.E. Dutton, reprinted 89
tetrapods, first Devonian tetrapod from Asia 2
The Map that Changed the World, S. Winchester 90–1
Theodoxus cantianus 224
thermal belts, along hillslopes, affecting vines 22
thermokarst (thaw) lakes, and pingo formation 212–13, *213*
thermophiles 100
THURSTON, E., Are the oldest 'fossils' fossils? 55
tiger's-eye, origin of 94–5
  chatoyancy 94
  crack and seal process 95, *95*
  new research by Heaney and Fisher 94–5
Times Atlas of the World, comparisons of old and new editions 191
tin mining infrastructure, more protection for 85
titanium 207, 208
Tower of London (front cover)4
trains, in Spain, the 'wrong type of ground' 85
treasure, volcanically-buried 83
Trigonia Bed 200
trilobites, a reason for their disappearance 6
tsunamis
  Stromboli and possibly Vesuvius 42
  world-wide 204–5
    possibility of identifying geomorphological features associated with 205
Tuktoyakyuk
  awesome climate 212
  built on peninsula of glacio-fluvial sands 214
  ice-wedge polygons 212, *213*
  and its pingos, growth and decline 214, *214*, *215*
  stands mainly on ice 215, *215*
    the ice cellar 214, *215*
  summer terrain 212
  utilities provision! 215
Tumbledown, Mount, Falkland Islands (back cover)3
Turkey, micromammal record 75
Tursiops truncatus 138

UK
  Great Storm of 31 January 1953 3
  hop growing, Frome and Teme valleys 27
  possibility of drilling for gas trapped in the Coal Measures 84
    problems associated with 84
  possible new network of reservoirs to combat rising water demand 190–1
  sacrificial Essex 119
unconformities, sub-horizontal 144
uranium-lead geochronology, from zircons 203
urtite 207
USA
  California, winemaking 24, *24*
  Colorado, underground coal burning out of control 82–3
  Grand Canyon classic reprinted 89
  hop-growing, Washington, Oregon and Idaho 27
  Kentucky and Tennessee, distilleries on Ordovician limestones 28
    limestone caves suitable for whisky maturation 29
  Lost Hills oilfield, subsidence measured using radar interferometry 9
  San Francisco earthquake classic 89–90
  Wyoming, drive to open up gas fields 83
    damage to land and aquifers 83
ussingite *209*

Van Gogh, Vincent, *Rain at Auvers*: 1890, conveys completely nature of the Tertiary rocks 149–50
Velates schmidelianus 224, 226
Venice, further attempt to measure sinking rate using Canaletto's pictures 5
Venus
  diapirs on 169–70
  heavy metal mountains 202

impact craters 169
large near-circular volcanic rises and plateaux, smaller coronae 169
coronae possibly created by broad mantle upwelling 169–70
unimodal hypsometry 169
Vermicularia recta 224
Vesuvius, Mount
authorities offer cash incentives to move from the volcano slopes 159
instability of seaward side may cause tsunami 42
'vibration' white finger 52, 87, 152, 156
Vietnam, Halong Bay (end cover)6
Viking iron-smelting in Temple Bar West, Dublin 216–18
archaeology at Temple Bar 216–17
conversion of habitation area to industrial use 216
industrial site described 217
industrial processes 217
evidence suggests production of metallic iron 217
mineral clues 217–18
importance of electron microscopy 218
slag with imperfectly smelted iron ore perhaps 218
vesicular glass devitrified 217–18
vital specimen, contained fayalite and wüstite 218
Viking arrival 216
Viking smelting 218
mounting evidence of samples representing slag 218
villiaumite 208
vines, effects of physiography and soils 22–4
New World wineries, geological factors deemed not important 23–4
vineyards, a role for remote sensing 158
vivianite 217
Viviparus lentus 224
volatiles, added to Earth's surface by asteroids and comets 99, 101
volcanic activity, weather induced 20
volcanic dust, causing cancer 44
vuonnemite 209

$^{182}W/^{183}W$ ratios 17
WALDMAN, M., Clack, J. is Jenny! (let.) 55
Walking with Cavemen (BBC series) 85
WALL, F., Kola Peninsula: mines and minerals 206–11
walls, closely reflect Britain's regional geology 15–16, *15*
WALTHAM, T.
Frank slide centenary 126–7
Lonar meteorite crater 167–8
Mutnovsky: a walk into a Russian volcano 46–7
Pingos of Tuk 212–15
war memorials 12
memorial gates 88–9, *88*
Watchet harbour, Somerset, sedimentation problems! 192–3
Bristol Channel silting and tidal range not taken into account 192–3
silt put back into Bristol Channel ready to return to Watchet harbour 193
silting up of new marina! 193
Watchet Regeneration decision, a marina to provide new jobs 192
water, in brewing 25
Wear, River, incised meanders at Durham 105
Welsh Botanic Gardens at risk 164–5
living fossils 165
West Keivy block, Kola Peninsula
amazonite 210–11
world's largest kyanite deposit 211
West Keivy block, Kola Peninsula 206, 210–11
Wetumpka astrobleme 58–9, 59
Wharfedale ice stream 179, 180
What the papers say 2–5, 42–4, 82–6, 118–19, 158–9, 190–2
Whernside 145
Whin Sill 105, 146
whisky, role of geology 27–9
1823 Excise Act, effects of 28
de-ionised water used to dilute the spirit for cask maturing 28
marketing over-emphasises importance of water 27–8
other geological influences 28–9
peatiness 28–9
situation of Islay distilleries 29, *29*
water soft and hard used 28
water in whisky 28
Whitlingham, Norwich, window of opportunity to examine this gravel pit before flooding 50
Whittlesea, P.S., on a window of opportunity at Whitlingham, Norwich 50
Wild boar Fell, interesting waterfalls 145
Wildlife and Countryside Act (1981), effects on erratics 47
Williams, Kyffin
A Wider Sky (autobiography) 149
canvasses of Snowdonia 149, *150*
writings on landscapes of North Wales 14, 149
WILLOX, D.M., *In Defence of the Geologist* 45
windfarms 194–5
classic views, should be conserved 195
in the Lake District, objections 194–5
offshore sites, objections raised 194
wine, beer and whisky: the role of geology 22–9
wine, role of geology 22–5
for and against 22
other geological influences 24–5
fining using bentonite 25
use of powdered diatomite 25
physiography and soil 22–4
planning tasks according to lunar and planetary cycles 25
WISEMAN, A., Jurassic-beach protection? (let.) 5
Wren's Nest, Dudley, West Midlands 65, 65, 66
wrinkle structures 56, 57
